

# The 5 Point SEO Scan

How to stop living on page 2 of Google.

Most people never scroll to page 2. Run these five checks in 15 minutes to see where you stand with local search.

## THE 5 POINT SCAN

- 1 Google your business name. Are you the first result? Does your Google Business Profile show with hours and photos?
- 2 Google "[what you sell] in [your island or city]". Are you on page 1?
- 3 Check every page title. Each one should say what the page is and where you are.
- 4 Open your site on mobile data. If it is slow, Google notices too.
- 5 Look for pages that answer the questions customers actually ask you.

## QUICK WINS

- ☐ Complete every field in your Google Business Profile.
- ☐ Add fresh photos to your profile every month.
- ☐ Ask happy customers for a Google review, with a direct link.
- ☐ Use the same name, address and phone number everywhere online.

## TRACK MONTHLY

|        |                                                 |
|--------|-------------------------------------------------|
| Rank   | Where you show for your 3 main searches.        |
| Clicks | Visits from Google to your site.                |
| Calls  | Calls and direction requests from your profile. |

**DO THIS TODAY** Ask 3 happy customers for a Google review today. Send them the direct link.
