

The Ad Budget Leak Check

Where small business ad money usually disappears.

Ads cannot fix a confusing offer. Before you spend more, find the leak.

THE 5 USUAL LEAKS

- ☐ Boosting posts instead of running a campaign with a clear goal.
- ☐ One audience, never tested against another.
- ☐ The ad sends people to a profile, not a page where they can act.
- ☐ Losing ads left running for weeks.
- ☐ No tracking, so nobody knows what actually paid back.

A SIMPLE TEST STRUCTURE

- 1 One offer, one landing page.
- 2 Three audiences, small equal budgets.
- 3 Run for 5 to 7 days.
- 4 Kill the losers. Move budget to the winner.
- 5 Scale only what pays back.

KNOW THESE NUMBERS

Cost per result	What you pay for each lead, booking or sale.
Click to action	How many clickers actually book or buy.
Return	What each result is worth to you.

DO THIS TODAY Send us a screenshot of your Ads Manager overview and we will point out your biggest leak.
