

The 10 Minute Analytics Check

Five numbers tied to money. Everything else is noise.

You do not need 12 dashboards. You need five numbers and a decision for each.
Answer these from your analytics.

THE 5 QUESTIONS

- 1 How many people visited your site last month?
- 2 Where did they come from: Google, Instagram, direct?
- 3 Which page do most people land on?
- 4 How many clicked your main button (book, call, WhatsApp)?
- 5 How many became paying customers?

CAN'T ANSWER 4 OR 5?

Then your tracking is not set up yet. That is the fix, and it is a one-time job: track button clicks, form submissions and bookings properly, once.

EVERY NUMBER LEADS TO A DECISION

Low visits	Work on Google and social reach.
High visits, few clicks	Fix the page: headline, button, offer.
Clicks but few customers	Fix the follow up: replies, booking flow, price clarity.

DO THIS TODAY Write your 5 numbers on one page. Do it again next month and compare.
