

Signs of a Prompt-Made Site

AI can make the page. It cannot make the plan behind it.

AI builders can produce a website in minutes. Here is how to spot one that was made from a prompt and left there.

THE TELL-TALE SIGNS

- ☐ Headlines that could belong to any business: "Elevate your experience".
- ☐ Stock photos of people who have never seen your shop.
- ☐ Buttons that go nowhere, or to a generic contact form.
- ☐ No real prices, hours, location or reviews.
- ☐ Every section the same shape, the same length, the same vibe.

WHAT ACTUALLY SELLS

Consultation	Questions that work out what you need.
Plan	One action per page, words written for your customer.
Proof	Your real photos, reviews and results.
Care	Someone who updates it when things change.

DO THIS TODAY Read your homepage headline. Could a competitor use it unchanged? Then rewrite it.
