

The Phone Check

Built for thumbs, not laptops.

Your customers are on phones. Open your own site on your phone and go through this list.

THE THUMB TEST

- ☐ Can you tap every button with your thumb without zooming?
- ☐ Is the text readable without pinching?
- ☐ Is your main button visible without scrolling?
- ☐ Does anything stick out sideways?
- ☐ Does the menu open and close easily?
- ☐ Is there a sticky book or call button as you scroll?

PHONE FIRST RULES

Buttons	Big, and placed where thumbs land.
Text	Short lines, decent size.
Images	Cropped for a tall screen.
Forms	As few fields as possible.

DO THIS TODAY Hand your phone to someone and ask them to book with you. Watch where they struggle.

Send us your link and we will check it on a few phones for you. DM @crode_studio or email hello@crode.studio
