

The Menu Check

Hungry people do not download PDFs.

A heavy PDF menu loses people before they see a single dish. Here is the check.

THE 5 POINT CHECK

- ☐ Is your menu text on a page, or a PDF or photo people have to zoom into?
- ☐ Does every dish have a price?
- ☐ Can someone order or call from the menu page?
- ☐ Can you change a price yourself in under a minute?
- ☐ Does it load fast on mobile data?

A WEB MENU BEATS A PDF

Speed	Loads instantly, no download.
Google	Text can be found in search.
Edits	Change a price in seconds.
QR	One code on the table, always up to date.

DO THIS TODAY Count how many taps it takes to see a price on your current menu.

Send us your menu link and we will tell you what to fix first. DM @crode_studio or email hello@crode.studio
