

Domain and Email Setup Checklist

Your email is the first line of every quote.

A free email address on a quote makes a business look small. A domain email takes an afternoon to set up. Here is the order.

THE SETUP CHECKLIST

- 1 Buy your domain (yourbusiness.com or .mv) in YOUR name, not a freelancer's.
- 2 Set up email on it: hello@ for general, and one for quotes or bookings.
- 3 Add your logo and phone number to your email signature.
- 4 Set up the records that stop your emails landing in spam. We can do this.
- 5 Put a simple website on the same domain so it backs up your emails.

OWN IT PROPERLY

- ☐ Domain registered in your name or your company's name.
- ☐ You have the login, not only your web person.
- ☐ Auto-renew is switched on.

DO THIS TODAY Check who owns your domain today. If it is not you, fix that first.
