

# The Shop Launch Checklist

Seven things your online shop needs before it opens.

"DM for price" is where sales go to die. People who cannot see a price usually do not ask, they leave. Tick all seven and your shop is ready to sell.

## THE 7 POINT LAUNCH CHECK

- ☐ Every product has a clear photo, a price and its sizes or variants.
- ☐ Prices are on the page, not hidden behind a DM.
- ☐ Checkout takes 3 steps or fewer.
- ☐ Delivery areas and fees are written clearly before checkout.
- ☐ Payment options your customers actually use are switched on.
- ☐ New order alerts go straight to your phone.
- ☐ There is a short returns or exchange line, even one sentence.

## PRODUCT PAGE MUST-HAVES

|         |                                                            |
|---------|------------------------------------------------------------|
| Photo   | Plain background, natural light, at least 3 angles.        |
| Title   | What it is, not a code. "Linen shirt, sand" beats "LS-04". |
| Price   | Visible without scrolling.                                 |
| Details | Size, material, care. Short lines, not a paragraph.        |
| Button  | One clear "Add to cart" in a strong colour.                |

## BEFORE YOU ANNOUNCE IT

- 1 Place a test order yourself on your phone.
- 2 Ask one friend to buy something and time how long it takes.
- 3 Fix the step where they hesitated.

**DO THIS TODAY** Pick your 10 best sellers and write a price next to each one. That is your launch range.
