

# Website Glow-Up: Before and After

A self-check now, and a personal sketch when you send your link.

People judge a website in seconds. A glow-up keeps what already works and cuts the rest. Run this check on your phone, then send us your link and we will sketch your before and after.

## THE 5 SECOND TEST (DO IT ON YOUR PHONE)

- ☐ Can a stranger tell what you do in 5 seconds?
- ☐ Is there one obvious button on the first screen?
- ☐ Do the photos look current, or like they are from years ago?
- ☐ Is the text big enough to read without zooming?
- ☐ Does it load before you lose patience?

## KEEP, CUT, FIX

|      |                                                                             |
|------|-----------------------------------------------------------------------------|
| Keep | Your domain, your best photos, real reviews, anything that ranks on Google. |
| Cut  | Sliders, auto-play music, pages nobody visits, walls of text.               |
| Fix  | Headline, main button, menu, phone layout, contact details.                 |

## WHAT YOUR SKETCH INCLUDES

- ☐ A side by side of your current first screen and our redesign idea.
- ☐ The new headline and main button we would use.
- ☐ A short list of what to keep and what to cut.

**DO THIS TODAY** Reply with your website link and we will send your before and after sketch.

Send us your website link to get your personal sketch. DM @crode\_studio or email [hello@crode.studio](mailto:hello@crode.studio)
